

**Remarks**

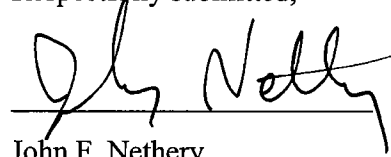

Claims 1, 7, and 8 have been amended and Claims 36 and 37 are added. Claims 1-37 are currently pending.

Assignee appreciates the Examiner's allowance of Claims 16-27. Assignee also appreciates the Examiner's acknowledgment that Claims 2-8, 10, 14-15, and 33 would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 1 has been amended to recite a first noise detector that is adapted to detect a wind buffet from an input signal by deriving and analyzing an average wind buffet model. Claim 28 has been amended to recite a signal analysis logic that models a portion of the sound waves that are associated with the wind to detect a wind buffet by deriving and analyzing an average wind buffet model. The feature of deriving an average wind buffet model was previously recited in Claim 7. The feature concerning not updating the average wind buffet model remains in Claim 7.

Assignee respectfully submits that the pending claims are patentable. If the Examiner believes that a telephone interview would be helpful in resolving any outstanding issues, the Examiner is respectfully invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "John F. Nethery", written over a horizontal line.
